

# KEEP YOUR KITTEN HEALTHY FOR LESS

with our monthly payment package (this is NOT insurance)

Kittens need frequent veterinary care in their first year of life to ensure maximum health. Our kitten wellness package saves you money on the total cost of necessary preventive care and treatments. Best of all, this package features budget-friendly monthly payments – making it easy to manage your kitten’s healthcare costs.

## Why does your kitten need preventive care?

### Illness is more common than you think

Kittens are highly susceptible to diseases because their immune systems are not full developed. It is important to vaccinate and deworm your kitten on a regular schedule in order to provide the maximum protection against contagious diseases.

### Growing bones need special care

Playful as they are, kittens are actually quite delicate and can suffer from a number of health problems in their first year. They need to be examined frequently in order to make sure their growth and development is on the right track.

### Prevention is the key to better health

Preventive care can help set the foundation for a lifetime of good health, so you and your kitten can spend more quality years together. It is essential for detecting diseases early on, before they become more serious – and more expensive.
